Practice 3.

Advanced server services (Windows Server, Centos/Debian, FreeBSD/Solaris).
Specifically:

• Managing Remote Installations

• User terminal server: LTSP, PXE, DRBL

• Instant Messaging (Jabber)

• Mail Server (Dovecot, Postfix+MySQL+amavis+spamassassin, sendmail+

clamav+MailScanner+spamasasin, Merak, WebMail)

• FTP Server (Serv-U, vsftpd, proftpd)

• RAID: (at installation time, later, administration, replacement of a disk)

• Backup (absolute, incremental and synchronization, AMANDA, RSYNC, etc)

• Collaborative server (Hula, OpenXchange, Opengroupware, Microsoft Exchange, …)

• Proxy Cache (Squid): Restriction of contents, pages, users, LDAP authentication.

• Routing, Firewall and VPN (one different in each OS)

• Monitoring services (Nagios)

Delivery on Dec, 12th.
